

BESICO KECHNEC

New Space Available for Lease in a Perspective Location for Your Business

Warehouse & Logistics

Light Industrial Production Facilities and Service

www.besico.eu

LOCATION

14 min from Valaliky (Volvo)

0.5 km highway

23 km Košice international airport This new and thriving industrial park is situated in the southern part of the Košice-okolie district, roughly 20 kilometres south of Košice and two kilometres away from the Hungarian state border. This location has enormous growth potential, as a new Volvo plant is being built near the village of Valaliky, just 14 minutes away from the industrial park.

The site is conveniently located near the exit of the E71 highway, providing easy access to the second biggest Slovak town, Košice, and comfortable highway access to Hungary. The strategic locations within the country are comfortably accessible through the highway.

Approximative distances

Košice	20 km	Prešov	57 kn
Miškolc (HU)	69 km	Žilina	270 kn
Budapešť (HU)	243 km	Bratislava	465 kn

BESICO standard

All rental spaces can be adapted according to the future tenant's requirements. To a certain extent, adjustments may be made even if a building is already under construction in order to accommodate the tenant's special technical requirements.

HEADQUARTER

all administrative space built to suit plenty of parking space

WAREHOUSE & LOGISTICS

high building standards from small units to big solutions according to your needs

PRODUCTION FACILITIES AND SERVICES

all infrastructure on-site tailor-made solutions

The approximate area will be the following according the lay-out. According the needs of the tenant this area can be adjusted before carrying out the works. The structure shall be designed for the following superimposed loads in addition to any other loads required by local codes (snow, wind, etc...). The columns are standardly placed on a grid of 12 × 24 m). Standard clear height between the floor and the lowest part of the load-bearing structure in the warehouse is 12 m. the height of offices, social and canteen is 2,6m. Production / warehouse floor will be flat and suitable for forklift truck use.

All inner walls will be made of gypsum, bricks or sendwich system. If the fire protection study requires a fire-resistant wall between the office building and the production, this will be done according to local regulation. Office spaces are air-conditioned, Interior doors and wall colours are as specified by the customer. Production / warehouse floor will be flat and suitable for forklift truck use.

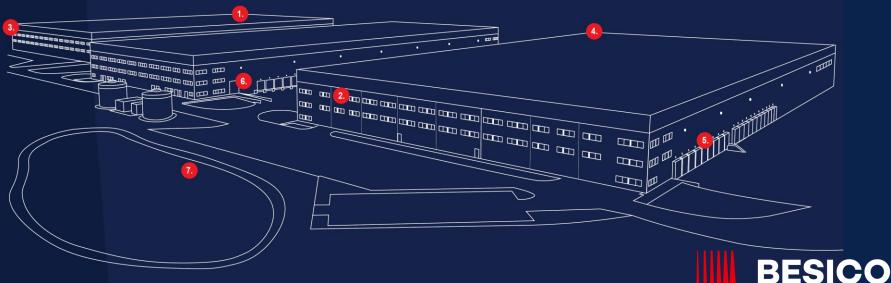

Plastic frames and glass will be used for windows in the offices, social rooms and canteen, Thereare not planned windows in the production / warehouse hall. Preparation for external sun blind will be installed on the office part of the building. At least 2%of the roof area will be made of transparent materials, motorized opening for daily ventilation 10 % to be open able.

The roof structure consists of loadbearing steelreinforced concrete beams, trapezoidal steel sheeting, a vapour insulation layer and thermal insulation of mineral wool segments and a top layer of waterproofing foil. Ready for photovoltaic system instalation.

The lighting of the production and warehouse hall will be addressed by LED lighting elements with min 250 lux according on local regulations. Offices, social and canteen: 500 lux by using recessed down lights. The lights are divided into independent control sections.

Sufficient loading ramps and gates are provided for truck loading and unloading. One truck dock with motorized insulated sectional gate 3.0 x 3.2 m per 880m2 of renter warehouse / production hall. All with hydraulic bridges. One Drive-in gate 4.0 x 4.5 m. The gates will have a transparent segment at eye level.

Upon request and if desired, we can work together with the tenant towards a higher standard. At basic standard parking lots will be constructed from drainage blocks. The front part will be finished with greenery.
